

Invitation

The 4th Coking Coal Blending Technology and Market Forum 2021

sxcoal cordially invites you to participate in the 4th Coking Coal Blending Technology and Market Forum to be held in Changsha city, central China's Hunan province over June 2-3, 2021.

2021 is the first year of China's 14th Five-Year Plan and the 100th anniversary of the founding of the Communist Party of China. It is also a year of special importance in China's modernization drive. As emphasized in the Central Economic Work Conference 2021 to maintain continuity, stability and sustainability of the macroeconomic policy, China will continue to implement a proactive fiscal policy and a prudent monetary policy this year so as to provide necessary support for economic recovery. A series of key tasks put forward at the economic conference aimed to promote stable and sound development of the Chinese economy will help fuel continued growth in the country's coal demand.

China has strengthened energy conservation, emission reduction and environmental governance, and the substitution of new and renewable energy for coal has further enhanced, which in turn will curb the growth of coal consumption. In the context, China's coal demand is expected to increase slightly in 2021.

Meanwhile, China will continue to release high-quality coal mining capacity in main northern coal production areas, while phasing out backward coal capacity in the south. China's coal production is expected to maintain growth momentum in 2021, with the increment further concentrated in Shanxi, Shaanxi, Inner Mongolia and Xinjiang. In terms of import, China's coal import sources will become more diverse, and the import volume is estimated to be roughly stable with the previous year.

With the government's pledge for carbon peak by 2030 and carbon neutrality by 2060, the Chinese coal industry, while continuously optimizing its supply structure and quality, needs to adhere to the high-quality development path, and achieve effective management in aspects of intelligent coal blending, resource management, production control, price forecasting and inventory management through

technological innovation and resource optimization, thus assisting companies' decision-making in procurement, production and sales. Relying on full-factor and full-process management and control, coal demand for economic and social development can be precisely met with increasingly lower **social** cost.

How can coal upstream and downstream companies take the initiative and actively respond in the new era? How will they deploy business under the new "Dual Circulation" development pattern? How can they cut cost and lift efficiency to enhance internal strength and competitiveness in the face of complex development environment? A host of issues concerning development of the coal upstream and downstream industries require expert judgment through in-depth discussion.

We will invite experts from coal and coke industries and participants from upstream and downstream companies in the coal, coke and steel sectors, discussing and sharing insights on supply and demand fundamentals in domestic and international coke and steel markets, coking coal/coke price trends, development strategies of coal and coke producers, digitalization and intelligent development of coal and coking industries.

We look forward to meeting you at the Forum.

1. Topics

- 1) 2021 China coal and coke market trend and supply-demand analysis
- 2) Analysis of coal demand in Chinese steel mills
- 3) Current situation, problems and prospect of Mongolian coal imports
- 4) Coke capacity replacement and market analysis
- 5) Big data-based coal/coke price forecast and its application
- 6) Adoption of intelligent coal blending technology to cut cost and lift efficiency
- 7) Coal quality characteristics of major Chinese coal production areas and application optimization
- 8) Coking coal quality characteristics and application
- 9) Intelligent management of coal washing plants
- 10) Application of big data in coking plant management

.....

Specific agenda will be published soon.

2. Organizers

Host: Sxcoal

Supporter: China Coking Industry Association

Co-organizers: Shanxi Bureau of Geology and Mineral Resources 213 Laboratory,
Yunnan Qumei Coking Industrial Development Co., Ltd.

Updating...

3. Agenda

Date		Location	Activity
June 2	09:00-21:00	Hotel	Registration
June 3	09:00-18:00	Hotel	Forum

4. Fees

1) Participate in person: 3,000 yuan/person for a single participant; 2,800 yuan/person for two or more participants. (The fee include service fee, documentation and meals on June 3; accommodation and round-trip travel will be at participants' expense.)

2) Virtual available: \$188/person with playback

3) Payment method: bank transfer or credit card

5. Participants

- 1) Managements, technicians specialized in coke oven and coal blending in coking plants.
- 2) Managements, technicians of test and coal blending in coal washing plants.
- 3) Coal and coke traders.
- 4) Blast furnace technicians in steel mills.
- 5) Coal mines, steel mills and other up- and down-stream producers.
- 6) Practitioners of coal and coke futures and securities.

Fenwei Digital Information Technology Co., Ltd.

Registration Form

Company name					Invoice title	<input type="checkbox"/> Yes <input type="checkbox"/> No
Participants	Name	Gender	Job title	Mobile No.	Email	
Company type	<input type="checkbox"/> Coal mine <input type="checkbox"/> Coal washing plant <input type="checkbox"/> Coke plant <input type="checkbox"/> Steel mill <input type="checkbox"/> Trader <input type="checkbox"/> Finance <input type="checkbox"/> Logistics and shipping company <input type="checkbox"/> Other					
Accommodation	Room type: () single room, () double-bed room, Check in: June (), Check-out: June ().					
Meals	Lunch and dinner on June 3.					
Remarks	Please fill in the electronic version of this form and select with "√" in <input type="checkbox"/> . The copied forms are valid. Please register three days before the forum date.					
Contact	Phone: 86 351 4728XXX, Email:
